Narrative commentary

The CET1 capital ratio was 11.0% as at April 30, 2026, in excess of the minimum regulatory requirement and the Bank's target management levels. The CET1 capital ratio decreased by 30 basis points compared with 11.3% as at October 31, 2025, mainly due to internal capital consumption. The Bank met OSFI's capital and leverage requirements throughout the quarter.

(1) Effective Expected Positive Exposure (EEPE) is the weighted average over time of the effective expected exposure over the first year, or, if all the contracts in the netting set mature before one year, over the time period of the longest-maturity contract in the netting set where the weights are the proportion that an individual expected exposure represents of the entire time interval

(2) Exposure at default (EAD) generally represents the expected gross exposures at default and includes outstanding amounts for on-balance sheet exposures and loan equivalent amounts for off-balance sheet exposures.

(3) Credit-risk-mitigation (CRM) refers to the attempt by lenders, through the application of various safeguards or processes, to minimize the risk of losing all of their original investment due to borrowers defaulting on their interest and principal payments.

(4) Standardized Approach for Counterparty Credit Risk (SA-CCR)

(5) Securities Financing Transactions (SFTs)
